

# Technology Acquisitions

Software, equipment, and service choices at volume pricing

## Why buy through DIS?

TechMall offers state and local government a cost-effective way to buy information technology products and services. Our equipment leasing program can drive down your total technology ownership costs too.

DIS has assembled the nation's top IT companies to compete for your business, so you don't have to devote staff time to technology acquisitions. These state Master Contracts are managed by DIS experts, or through the Western States Contracting Alliance (WSCA).

So whether you need a single wireless phone or laptops for an entire office, you'll get labor-saving support and collective purchasing power.

## Hundreds of choices at [techmall.dis.wa.gov](http://techmall.dis.wa.gov)
